Application procedure, deadlines: The deadline for application is May 31st of each year. The entrance examinations are held once a year in the first or second week of July. For the precise dates please check the ISC website or contact the relevant contact person

Preparatory courses: A 3-week preparatory program is organised in both Mathematics and English prior to the entrance exams.

Credit system: An internationally accepted credit system is used at the ISC. Students must accumulate a total of at least 240 ECTS credits within the 8 semester period of their studies (with the breakdown between core and elective courses being determined by the ISC). Most courses are worth 6 ECTS credits (two 75 minute classes per week), while some courses are worth only 3 ECTS credits (usually these are just one 75 minute class per week).

Partial training and credit transfer possibilities: Erasmus program, CEEPUS program, CEMS, bilateral and multilateral agreements, free movers for one or two semesters.

Accommodation: Through its contacts with individual owners and real-estate agencies, the ISC assists students to the best of its ability in finding a flat to rent for the duration of their stay, by providing the information at its disposal on flats offered for rent and on real estate agencies. The monthly rents range from about 300 EURO to 350 EURO/person depending on the size and location of the flat, as well as on the number of students sharing it..

Courses offered in German:

The German Program in Business Administration has been developed at the BUESPA in cooperation with the University Passau.
The program provides the students of BUESPAn an additional certificate of this program beside their diploma of BUESPAn. The certificate is highly appreciated by the business community in Hungary operating on the European markets.
From 2003 a double degree program will be provided both the graduates of the German program of BUESPAn and the students of the University Passau.
The double degree will be given based on the common recognition of studies on the partner universities using ECTS credits.

Degree courses offered in French.
Two-year undergraduate program on the Faculty of Architecture, Civil, Chemical, Electrical Engineering and Informatics, Mechanical and Transportation Engineering, Economic and Social Sciences leading to DEUG degree in cooperation with INSA de Rennes. Students after graduation can continue studies on the Hungarian programs with French window subjects or on French or other Francophon universities.

Enseignement dispensé en langue francaise
Un programme d'enseignement totalement en langue française est assuré au niveau du premier cycle (4 semestres) dans les facultés suivantes: Architecture, Génie Civil, Génie Chimique, Génie Electrique-Informatique, Génie Mécanique, Transport et Sciences Economiques et Sociales. A la fin de cette formation les étudiants recoivent le DEUG signé par le Recteur de l'USTEB et le Directeur de l'INSA de Rennes. A partir de la troisième année, les étudiants joignent la formation en langue hongroise mais ont la possibilité de suivre certains modules "ponctuels" en langue française, ou de participer dans des périodes d'études d'un ou deux semestres, éventuellement faire le Projet de Fin d'Etudes dans les établissements partenaires en France ou en Belgique.

Courses offered in German:
Two-year undergraduate program on the Faculty of Civil, Chemical, Electrical Engineering and Informatics, Mechanical and Transportation Engineering in cooperation with University of Karlsruhe. Students after the two-year program can continue studies in the 5. semester at the University of Karlsruhe and from the 6. semester on the Hungarian programs with German window subjects.

The certificate released is in Hungarian and German language with the signatures of the Rectors of both University.

Studiengänge in deutscher Sprache:
An den Fakultäten für Bauwesen, für Elektrotechnik und Informatik, für Maschinenbau und für Verkehrswesen gibt es in den ersten 4 Semestern deutschsprachige Ingenieurausbildung im Rahmen eines gemeinsamen Programmes mit der Universität Karlsruhe.
Im 5. Semester studieren die Studenten an der Universität Karlsruhe und ab dem 6. Semester wieder an der TWU Budapest in ungarischer Sprache.
Einige Fächer werden aber weiterhin in deutscher Sprache angeboten.
Die Absolventen erhalten zweisprachige Diplomurkunden mit den Unterschriften der Rektoren beider Universitäten.

Library: Founded in 1735. The total stock contains about 550,000 books and 2,663 journals. The Central
Library has about 100,000 users every year.
Computer facilities: The University provides the computing facilities needed to support all the courses offered
as well as research work. Computing facilities are based in the University Computer Centre, the Faculty
Computer Centres, the computing laboratories of the Institute of Information and the computing laboratories of
the various departments. The computing facilities in the different laboratories are varied, ranging from personal
computers to multi-user systems. Most of these computers are linked to the university network providing easy
access to university data banks, software tools, library on-line catalogue, workstations, large computer systems
and the Internet as well.
Sports facilities: 12 tennis courts, a football stadium, a sport hall with up to date facilities, several gymnasiums
and keep-fit rooms, basketball and valley-ball grounds.
Accommodation: On arrival the students get temporary lodging in one of the halls of residence until they rent a
flat in the town. Their tutor helps them in finding suitable accommodation. The tutors help the students both in
adapting the academic and every day life in Hungary.
Preparatory course: The preparatory courses offered are of one year’s duration. The main objective of these
programmes is to develop a command of the working language. A further goal is to bring students up to the level
required for academic success in basic subjects. A successful completion of the preparatory course will permit
the student to join a degree course.

                         Biology written test and oral examination,
Graduates of this program will be familiar with natural and sport sciences and will be able to analyze and apply the principles of human movement structure, as well, as will be able to collect and analyze scientific data of different movements activities and study their effects on human body. Human Kinesiology deals with human movement; it investigates the movement of healthy people for performance improvement and disabled patients, persons with special needs for habilitation, rehabilitation and movement correctional purposes. It examines the laws of the movement of biological systems in their interactions with the external world and in their complexity by natural scientific method. In this way, it is closely associated not only to physics and mathematics, but also to anatomy, physiology, biochemistry, orthopedics, pathology and even psychology. It is generally accepted that kinesiology has independent field of research and applies independent methods. Therefore, the qualification can be used in sport science laboratories, health centers, research laboratories of medical institutions, sport centers and clubs, PE and other departments of higher education, institutions in teaching and research positions, fitness-wellness-health centers, etc.

Established: 1950
Academic staff: 42
Academic staff with scientific degree: 25
Number of students in the academic year 2002/2003 (Hungarian education): 584

Brief Information:
The predecessor of the Academy, the Hungarian State Ballet Institute was founded in 1950. The status of academy was given to the institute in 1983 and today it is known as the Hungarian Dance Academy. It trains professional ballet dancers, theatrical dancers, Hungarian folk dancers, ballet-, folkdance- and ballroom dance pedagogues, choreographers as well as dance theorists. Classical ballet is taught according to the Vaganova method.

At the Hungarian Dance Academy there are two main directions of training and different specializations:
I. Performing artist training:
I. 1. Specialization in ballet art: training and education lasts 10 years. Students graduating from this faculty gain a ballet artist degree.
I. 2. Specialization in folkdance and theatrical dance: offers an academy-level diploma as well.
In these two trainings college level starts at age 16, and next to the professional subject students follow secondary school academics, before going on to college level.
Students from abroad can join the Hungarian classes for full or partial training.

II. Teacher’s training and other specializations:
II. 1. Specialization in dance pedagogy: is run in the form of an evening course. Applicants must have either a final examination, a qualification at a secondary school specializing in dance or a certificate of the specialization in ballet art as well as practical professional experience. The Academy has taught and trained dance teachers since 1955. Classical ballet teachers’ training is available in English, following an intensive schedule.
II. 2. Specialization in choreography: specializations in contemporary ballet, folk dance.
II. 3. Specialization for dance theory writers: is a programme for post-graduates. Applicants must have a university or college degree in classical studies or in the field of arts.
